

# EZ WAX DISPENSING SYSTEM

## FOR CONTAINER CANDLES

**THE EZ WAX DISPENSING SYSTEM** is designed for filling containers or molds. Easy to use and operate with many different waxes with temperature ranges from 135 to 195 degrees Fahrenheit. The innovative design, exclusively a Rite-Hete product that is manufactured on-site in our factory, allows for *fast* filling. Fill 12 oz. jars in 6 seconds! Order your system today!

### THE EZ WAX DISPENSING SYSTEM INCLUDES:

- **LIGHTWEIGHT HEATED TEFLON HANDGUN:** Designed with the candle maker in mind, the heated handgun is rugged, durable and completely heated with its own thermostat for stop-and-go pouring. Includes swivel for easy management.
- **6 INCH EXTENSION NOZZLE:** Ideal for pouring into deep glass jars.
- **8 FOOT HEATED TEFLON STEEL-BRAID HOSE:** Designed with rugged construction, the flexibility of this braiding, combined with the inherent flexibility of the Teflon core, produces exceptional construction to withstand even the strongest colors and scents. The smooth bore Teflon core also provides for easy cleaning with very little residue from previous colors and scents. Purge out the last color and scent fast! Estimated waste per batch is approximately 3 ounces. No mess or time delay in color change. Includes its own thermostat control and a swivel for easy management.
- **HEATED IMPELLER PUMP-FROM 0 UP TO 1 GALLON PER MINUTE**
- **MANUAL OR TIMED DISPENSE (1-30 SECONDS)**
- **120 VOLT POWER SUPPLY**
- **1 YEAR WARRANTY**

The system connects to the  $\frac{3}{4}$ " ball valve on your melting tank. The ideal system is matched with our VRS Direct Heat Melters. The smaller VRS tanks are high-end commercial fast melt tanks, ideal for mixing your color and scent directly into the tank. Place the complete system on a rolling cart and you have a fast portable filling system.

## SYSTEM DESIGNED FOR USE WITH THE FOLLOWING MATERIALS:

- Paraffin wax
- Vegetable and soy
- Beeswax- pouring temperatures 135 to 195 degrees Fahrenheit (must have the viscosity of water when melted to work)
- Balms and lotions- pouring temperatures 135 to 195 degrees Fahrenheit (must have the viscosity of water when melted to work)
- Sorry! NOT food grade approved.

(See our *EZ Gel Filling System* for other applications such as Gel or lower temperature material filling.)

## SYSTEM BENEFITS:

- Increases production, reduces waste & clean up with direct filling
- Consistent pouring temperatures
- Adjustable pump flow
- Allows for stop and go
- Eliminates pouring and the cleaning of pouring pots
- *FAST AND EASY* color change

**2016 PRICING IS \$1881.00 + SHIPPING.**
